Air Pillow Material

Air pillows are a low-cost, highly effective interior cushion, block and brace and void fill option that delivers significant benefits. They are quickly produced on-demand to minimize inventory and storage requirements, or produced in batches and fed to packing stations through an integrated dispensing system. Air pillows are created when polyethylene film feeds into a machine and individual pillows are inflated with ambient air and then heat sealed. Multiple sizes are available.

The AirPouch Air Pillow material can be found on page 46. Ask your Account Manager for more information about the air pillow systems we offer!

Peanuts

Peanuts easily fill in and around the contents of a shipping box, providing a cushion of protection on all sides. Made of moisture-proof material, peanuts are a lightweight packing alternative that saves on shipping costs, yet is durable enough to be reused.

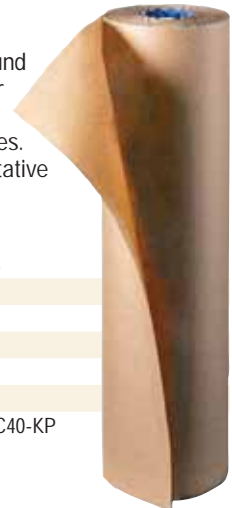

DESCRIPTION	PACKAGED	ITEM CODE
Packing Peanuts	14 Cubic Feet	14CF

Kraft Paper

Kraft paper is generally used as void fill around a product inside a box. It is also excellent for wrapping delicate products prior to packaging. Our kraft paper comes in a variety of sizes. Talk to your local Carlson Systems representative if you need a size not listed below!

Call for availability of other sizes!

Now Available:
Pregis AirSpeed 1000 and AirSpeed 3000 Inflatable Packaging System

Ideal for low-volume applications; all you need is a standard air compressor!

Foam Padding

Features	Advantages	Benefits
Made from 100% low density polyethylene (LDPE)	Makes Starfoam a highly flexible wrapping material	Gives diverse packaging alternatives for surface protection interleaving and cushioning
Manufactured without the use of CFC's or HCFC's	Environmentally friendly	The environment is protected by not using ozone depleting chemicals
100% recyclable	Environmentally friendly	Never needs to go to a landfill site
Non-abrasive	Gives excellent surface protection	Will not scratch or damage finely-finished surfaces
Lint and dust free	Will not mark or contaminate products	Can be safely used to protect highly sensitive products
Moisture repellent (Closed-Cell construction)	Inert to water, grease, and solvents (below 130° F)	Superior protection against moisture and grease
Light-weight	Reduced package weight	Lowers production and shipping costs
