

Steel Seals and Strap Caddy Kits

Open Seals

Also known as "snap-on" seals, these are put over the overlapping strapping ends prior to tensioning.

Push Type Seals

Also known as "overlap" seals and are pre-threaded and used when strap is tensioned by butting the nose of the push-type tensioner against the seal.

Closed Seals

Also known as "thread-on" seals. Strapping must be threaded through before tensioning.

Semi-Closed Seals

Heavy-duty version of the Open Seal, they have one open and one closed leg.

Steel Seals

Strap Caddy Steel Banding Kits

The Strap Caddy Kit is a complete portable steel strap solution. Ready to carry and use steel strap, tools, and seals in a carry-all dispenser. Perfect for low volume, occasional and satellite operations. Included tools: Tensioner (SST-34), Sealer (SSS-12 or SSS-34) and a Shear Tool (H51).

Tools are medium duty rated and mount in the Strap Caddy carrier with steel strap and seals. Tools, strap and seals are also available separately.
